ACNE CONTROL

3 IN 1 CLEANSER

SOLUZIONE DETERGENTE

Deterge, purifica, esfolia con acido salicilico

CLEANSING SOLUTION

Cleanses, purifies, exfoliates with salicylic acid

Thorough facial cleansing is an essential step in the treatment of acne-prone skin, especially when acne occurs in its acute phase. There are two aspects which an effective treatment must aim to: the extreme mildness, as the skin tissue already sensitized and overstimulated could react with a rebound effect, and the antibacterial, antimicrobial activity, essential to stem the causes of acne. 3in1 Cleanser works with this in mind: it boasts a very high skin tolerability formulation free from lauryl sulfates and oxyethylenates, and it incorporates active ingredients with anti-inflammatory, soothing properties such as Rice Protein Hydrolyzate, Aloe Vera and extracts of Chamomile and Licorice. Finally, the supply of Salicylic Acid (formula containing 2%) is essential: its proven keratolytic, smoothing properties boost the exfoliation of the surface layers of the skin, while its bacteriostatic, soothing action counteracts and prevents the onset of pimples and their consequent inflammation.

THE ACTIVE INGREDIENT

SALICYLIC ACID

It is a beta-hydroxy acid derived from the enzymatic hydrolysis of salicin (extracted from Willow), characterized by marked keratolytic, smoothing properties. Its action consists in selectively breaking the keratin protein chain which is abundantly present in the corneocytes, thus decreasing the force of cohesion that keeps these cells linked to each other. In this way it promotes the cell turnover which is essential for the treatment of acne-prone skin. It also boasts proven bacteriostatic, soothing properties.

HYDROLYZED RICE PROTEINS

They are proteins obtained from Rice whose molecules have been reduced in order to better penetrate the skin. They boost the ability of the skin tissue to retain water, thus preventing dehydration.

ALOE VERA

Succulent plant of the Aloeaceae family, it is very rich in precious substances for the skin: complex sugars such as mucopolysaccharides, enzymes, lignins, saponins and phospholipids. They synergistically interact by resulting into tangible benefits for the skin: hydration, suppleness, counteracting the signs of aging and luminosity.

EXTRACT OF CHAMOMILE AND LIQUORICE

They provide a moisturizing, soothing, anti-inflammatory action that also improves the redness and normalizes the skin.

THE PRODUCT

3in1 Cleanser is a gentle, well-balanced product boasting an extreme skin tolerance to offer an effective, safe cleansing to the skin with impurities and acne, even in its severe stage.

INDICATIONS

Product for external use, for the treatment of acne-prone skin.

HOW TO USE

Moisten the skin of the face and apply the product until a soft lather is formed. Massage for a few moments and rinse off thoroughly. Perform the cleansing treatment morning and night for the entire treatment period. Complete the treatment with Acne Control products.

WARNINGS

Avoid contact with eyes. Keep out of reach of children.

Packaging
100ml PE bottle. In a box.
