

## DIAPER PASTE

### PASTA BARRIERA

Per il cambio del pannolino

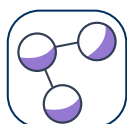

### BARRIER PASTE

For diaper rash

A gentle formulation with 94% natural origin ingredients and a barrier effect to protect the baby's skin at every diaper change, to prevent the onset of irritation and treat any existing ones. It restores and soothes red skin, creating a protective film that isolates and defends the skin from irritants, such as urine and chafing.

It contains 15% zinc oxide boasting a soothing, protective action, bio-balancing Neozone 4000 boosting healing processes, and natural Epsomite specific for the recovery of inflamed and irritated skin.

The mild botanical oils of Chamomile, Sunflower and Calendula soothe, moisturize and soften, giving the sensation of a caress when changing diapers.

## THE ACTIVE INGREDIENTS

### ZINC OXIDE

It is a chemical compound obtained from Zinc, boasting soothing, protective properties. It prevents and counteracts erythema due to contact with irritants, and promotes tissue regeneration thanks to its antioxidant action. It also boasts an antibacterial function, essential for skin that is always under control.

### NEOZONE 4000

Sunflower oil bubbled through ozone at 4000meq/lit. Its well-known antiseptic action is synergistic with the stimulating action of the healing and rebalancing of the epithelial tissue.

### NATURAL EPSOMITE

Natural Epsomite or Magnesium Sulfate is a salt composed of magnesium and sulfur, also known in the spa treatment sector for its calming and soothing properties. It relieves pain and a sense of discomfort, carrying out a refreshing action.

### BOTANICAL OILS OF CHAMOMILE, SUNFLOWER AND CALENDULA

They are oils derived from the respective botanical species and selected for their soothing, velvety and moisturizing properties. In synergy, they give the skin an exclusive softness.

#### THE PRODUCT

Diaper change paste is formulated for use from the first days of life, boasting a soothing, protective action. Its formula contains 94% natural origin ingredients.

#### INDICATIONS

Product for external use, for the treatment and prevention of diaper rashes.

#### HOW TO USE

At each diaper change, after having cleansed and dried the skin, apply the paste with a light massage and evenly, especially on the folds of the skin. The non-total absorption and the presence of a light white thin layer is an indication of the protective efficacy of the product.

#### WARNINGS

There are no specific counterindications under normal conditions of use. Keep out of reach of children.

Packaging  
30ml PE tube. In a box.
