

EMERGENCY OIL

OLIO RIPARATORE ALL'OZONO

OZONE RESCUE OIL

Our laboratories have thoroughly investigated the stimulating action of ozonides on the skin tissue repair processes, and such investigation has found its natural conclusion in Emergency Oil.

The combination of Neozone 4000 (ozonized sunflower oil) and α -bisabolol (patent no. 0001404677) performs a synergic sanitizing and energizing activity while repairing the epithelium, even in case of prolonged and severe chronic conditions.

THE ACTIVE INGREDIENTS

NEOZONE 4000 15%

Neozone 4000 is sunflower oil ozonized with 4.000 meq/l of added oxygen, corresponding to an average value of 9,6%.

ALFA-BISABOLOL 1%

α -bisabolol is widely known for its soothing action.

THE PRODUCT

The oily consistency of the product has been conceived to create a film-coating effect, which protects the area to be normally treated through environmental exposure of deeper layers. Due to its hydrophobic nature, the water-repellent film remains on the skin and guarantees a prolonged protection, while ozonides - naturally characterized by increased hydrophilicity - can be better absorbed and perform a more efficient repair-stimulating action.

INDICATIONS

- when in need of repair processes stimulation and of a powerful sanitizing action.
- to treat and heal chronic ulcers on the lower limbs of diabetics.
- assists in the treatment of bedsores.
- in general, to treat reddening, minor wounds, insect bites and inflammatory processes.

HOW TO USE

Carefully rinse the target area before applying Emergency Oil. Spray from a distance of approx. 15-20 cm, making sure that the entire area is covered. The application can be repeated multiple times. Cover and protect the area with suitable dressings.

WARNINGS

- keep away from sources of heat. Store at a temperature below 30°C, possibly in a refrigerator.
- do not use on injured skin or in case of known hypersensitivity or allergies to one or more components.
- keep out of reach of children.
- avoid release to the environment after use.
- the application of the product on open skin may cause some burning, that disappears after a brief lapse of time.

Packaging
30ml PE bottle. In a box.
