

EMERGENCY H

CREMA ALL'OZONO PER LE EMORROIDI

OZONE HAEMORROIDS CREAM

The issue of treating the perianal area affected by an alteration of vessel walls of the peripheral circulation - commonly known as external haemorrhoids - involves a synergic action of ozone and of its derivatives ozonides with active ingredients and plant extracts, featuring confirmed beneficial properties on the tone of capillary walls. The sanitizing and stimulating action of Neozone 4000 (ozonized sunflower oil) prepares the vasoprotective activity of chestnut-derived escin and of blueberry and butcher's broom extracts.

Lastly, 18- β -glycyrrhetic acid is included by virtue of its desensitizing and soothing action on the epithelium affected by inflammatory stress.

THE ACTIVE INGREDIENT

NEOZONE 4000 10%

Neozone 4000 is sunflower oil ozonized with 4.000 meq/l of added oxygen, corresponding to an average value of 9,6%.

18- β -GLYCYRRHETIC ACID 0,2%

L'attivo in natura presente nella radice della liquirizia è conosciuto per la sua attività antinfiammatoria simile ai derivati del cortisone.

ESCIN 1%

This active ingredient derives from chestnut and brings about vasoprotective and reinforcing properties on the capillary walls.

BUTCHER'S BROOM, BLUEBERRY AND MARIGOLD EXTRACTS, tot. 1,5%

All these integral glyceric extracts feature widely confirmed beneficial effects on the circulatory system, by virtue of their calming and soothing action on inflamed areas.

MINT ESSENTIAL OIL

Its fresh effect aims at lowering the sensitivity threshold of the treated area, which is usually very sensitive and sore.

THE PRODUCT

Its emulsion-like consistency, with an external water phase, eases the distribution, the availability of active ingredients for an immediate product efficacy and offers a certainly appreciated sensation of freshness.

INDICATIONS

- assists in treating external haemorrhoids in the perianal area.
- performs a preventive and sanitizing action on the perianal area.

HOW TO USE

Carefully rinse the perianal area to be treated; spread an abundant amount of cream and perform a careful and mild local massage, to foster its absorption.

Apply at least twice a day for a week. If needed, extend the applications.

WARNINGS

- keep away from sources of heat. Store at a temperature below 30°C, possibly in a refrigerator.
- do not use on injured skin or in case of known hypersensitivity or allergies to one or more components.
- keep out of reach of children.
- avoid release to the environment after use.

Packaging
25ml PE tube. In a box.
