REFRESHING INTIMATE SOAP

With Ozonized Oil and Mint and Mallow extracts

A delicate action and a refreshing effect in this intimate cleanser for daily use.

Its formula respects the physiological pH of the skin and is perfected by a combination of Lactic Acid and Aloe Vera with protective properties, Mallow extract boasting a soothing action, and Mint extract for a freshness effect. Neozone 4000 Ozonized Oil and its purifying properties help prevent the onset of ailments and discomfort, while Glycerin keeps the skin hydrated and soft.

Emergin Fresh does not contain sles, dyes or allergens.

THE ACTIVE INGREDIENTS

MINT EXTRACT

Obtained from Peppermint, it guarantees an “iceberg effect” on the skin, that is, it stimulates a feeling of freshness on the treated area, carrying out a tonifying, refreshing and soothing action.

MALLOW EXTRACT

The wild Mallow (*Malva sylvestris*) owes its name to the Latin word “malva”, that is “soft”: an attribute given to it for its emollient properties. It boasts a softening, refreshing and anti-reddening action, which are essential for the treatment of delicate areas.

NEOZONE 4000

Sunflower oil bubbled with ozone at 4000meq/l. Its well-known purifying action is synergistic with the rebalancing and protective action of the skin tissue.

ALOE VERA GEL

Extracted from Aloe leaves, it is a treasure trove of substances with different activities, including purifying and sanitizing action combined with a soothing and rebalancing action.

LACTIC ACID

Lactic acid is an alpha-hydroxy acid (AHA) used as a regulator of the hydro-lipid balance. It also performs an exfoliating, renewing action.

GLYCERIN

Glycerin (or glycerol) is a substance widely used in cosmetics due to its moisturizing, lubricating and emollient properties. Thanks to its humectant and hygroscopic properties, it improves skin hydration giving it a soft and velvety touch.
