## SCARGEL PLUS

### FORMULA CON OZONO

Coadiuvante nel trattamento delle cicatrici

### FORMULATION WITH OZONE

An aid in treating scars

Scargel Plus is a special formulation based on the synergic activity of active ingredients exerting a protective and moisturizing action, which fosters the regeneration and reactivation of the epithelial tissue.

### THE ACTIVE INGREDIENT

#### NEOZONE 4000 0,15%

Sunflower seed oil charged with ozone (4.000 meq/l). Its unquestionable antiseptic action is synergistically combined with the stimulation of the repair and rebalancing activity of the epithelial tissue.

#### ONION EXTRACT

It contains sulphur compounds and flavonoids, exerting an antiseptic, protective and regenerating action on the epithelial tissue made amorphous by the cicatrisation process.

#### ALLANTOIN 0,5%

It fosters the cell turnover and skin hydration, bringing about an improvement in minimizing the aesthetic visibility of scars.

#### HYALURONIC ACID, COLLAGEN, PANTHENOL AND ALOE VERA

They are natural substances that - through different mechanisms - increase the skin hydration and keep elasticity and smoothness, by reducing roughness and blemishes.

## THE PRODUCT

The gel structure allows for a quick delivery of active ingredients, so that they can perform their beneficial action in improving the aesthetic appearance of existing scars and minimizing the effects of newly-developed ones.

## INDICATIONS

Scargel Plus is formulated to improve the incipient cicatrisation process and to soften the aesthetic look of existing scars. The improvement of the skin tissue appearance is enhanced by the stimulation of epithelial cell activity and the increase in skin hydration and elasticity.

## HOW TO USE

Regularly apply Scargel Plus on the target areas twice a day for 60 days, in case of new scars, and continue the application for more 30 days in case of existing ones.

## WARNINGS

- Keep away from sources of heat.
- Store at a temperature below 30°C, possibly in a refrigerator.
- Do not use on injured skin or in case of known hypersensitivity or allergies to one or more components.
- Keep out of reach of children.
- Avoid release to the environment after use.

Packaging  
20ml PE bottle. In a box.
