## SKIN REPAIR

### CREMA RIPARATRICE PER LA PELLE

Idratante e Rigenerante la barriera protettiva

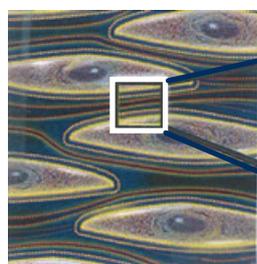

### SKIN REPAIR CREAM

It hydrates and renews the skin protective barrier

Skin Repair is a special so-called “liquid crystal” emulsion, which comprises lipid layers alternating with hydrophilic solution layers. This lamellar structure – typical of liposomes – imitates the structure of cell membranes.

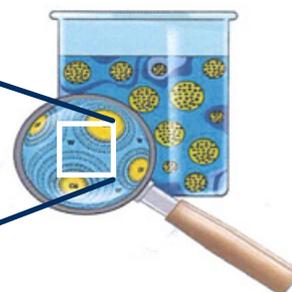

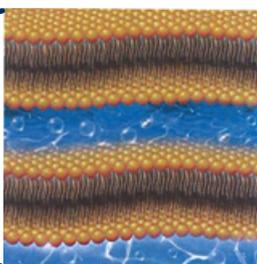

This similarity enables and fosters the penetration and the gradual transfer of active ingredients to the skin.

The principle of “cell biomimetism” maximises the action of active ingredients and is more efficient in terms of controlled release over time.

## THE ACTIVE INGREDIENTS

### NEOZONE 4000 0,18%

Neozone 4000 is sunflower oil ozonized with 4.000 meq/l of added oxygen. In this embedded percentage, it stimulates the cell activity by means of “oxidative stress”.

### HYALURONIC ACID 0,1%

The skin integrity mainly depends on the skin's water content. Hyaluronic acid is the best biological moisturizer available.

#### CERAMIDE NP; CERAMIDE AP; CERAMIDE EOP; PHYTOSPHINGOSINE; CHOLESTEROL

A pool of plant-derived ceramides identical to that of the skin. The ceramides are defined as “the intercellular cement” and are essential to keep the epidermis structure intact and firm. They feature a moisturizing effect and perform a notably increased protective action on the barrier.

#### AVOCADO OIL 2%

An oil rich in Vitamin F and unsaponifiable matter, as to increase smoothness, elasticity and the barrier effect.

#### MALLOW, CHESTNUT AND ALOE EXTRACTS, tot. 1,2%

For a global hydrating, soothing, reddening-improving action and thus to normalize the skin.

### THE PRODUCT

The emulsion is built up as a multilamellar system featuring alternating lipid and aqueous layers – the so-called “liquid crystal” system. This structure takes advantage of biomimetism, due to the similarity to cell membranes, to ensure a faster but gradual and effective penetration and absorption.

### INDICATIONS

Skin Repair is ideal when the skin excessively peels, is highly dehydrated, is hypersensitive and prone to irritation. It is perfect to treat atopic dermatitis and mild forms of eczema. The use of the product is suitable also on children from six months on localized skin areas.

### HOW TO USE

Apply the cream on the target areas. Repeat the application multiple times a day, as needed.

### WARNINGS

- Keep away from heat sources.
- Store at a temperature below 30 °C, possibly in a refrigerator.
- Do not use on injured skin or in case of known hypersensitivity or allergies to one or more components.
- Keep out of reach of children.
- Avoid release to the environment after use.
- For external use only.

Packaging  
50ml PE tube. In a box.

  
MADE IN ITALY
