

THERMAL CLOUD

ACQUA BOTANICA RINFRESCANTE

REFRESHING BOTANICAL WATER

A product to be vaporised on your facial skin, for an extra-refreshing effect and to release valuable eudermic active ingredients. The unique Salsomaggiore Thermal Water remineralises and revitalises the skin tissue, while the Peach Blossom extract helps the skin in contrasting the oxidative stress caused by air pollution - in particular by small particles - and in slowing down the production of waste substances derived from cell metabolism. In addition, the distilled water of Cornflower decongests and soothes and the White Peony extract improves the skin smoothness, by adjusting reddening and dyschromia, while the Damask Rose extract contrasts the signs of ageing. By virtue of these features and of its extreme convenience, Thermal Cloud is an out and out wellness treatment for the skin, to be carried around for repeated applications and a pleasant comfort feel.

The product is certified ICEA COSMOS NATURAL.

THE ACTIVE INGREDIENT

FOSSIL BROMO-IODINE SALT THERMAL WATER

Thanks to its unique combination of Salt and Trace Elements, it remineralises the skin tissue and ensures the normalisation of microcirculation, with a positive impact of the whole skin biochemistry.

PEACH EXTRACT

The air pollution due to combustion, smoke and UV and IR rays interferes with the cell mechanisms and affects the skin health, as it reduces its defence ability against environmental aggressions and speeds up the ageing processes (a phenomenon known as photo-polluaging). The Peach extract intervenes on such processes, by helping in considerably reducing the oxidative stress related to PM and UV, slowing down the damages due to Oxygen Radicals (ROS), preventing the cell asphyxiation, i.e. with a detoxing function, decreasing the production of cell waste substances and protecting the skin from early ageing.

DAMASK ROSE EXTRACT

It is a fine extract, rich in essential fatty acids and vitamins promoting the preservation of collagen and exerting a soothing and redness-relieving effect. It further boasts antioxidant properties.

WHITE PEONY EXTRACT

Derived from the roots, it features marked antioxidant properties, exerts a soothing action and helps in rebalancing and normalising the skin.

CORNFLOWER DISTILLED WATER

Cornflower, a plant very rich in Anthocyanins and Flavonoids, Sesquiterpene Lactones, Tannins and Pectins, has long been known for its decongestant, anti-reddening and astringent properties. The water derived from it is extremely mild and is also ideal to treat the periorcular area. Its renewing and soothing action is especially suitable in case of dry and dehydrated skin, to which it confers relief and comfort.

HYALURONIC ACID

Best-known for its sharp moisturising properties, it is a core component of the dermis - giving the skin resistance and tone - and thus improving its damage repair ability.

THE PRODUCT

An aqueous solution containing a percentage of natural humectants, moisturising and protective active ingredients and remineralising Bromo-iodine salt thermal water.

INDICATIONS

- To contrast pollution and dehydration
- To fix the make-up and achieve an immediate “wet effect”

HOW TO USE

Repeatedly vaporise on face and neck from a 30 cm distance. It can also be directly sprayed on make-up. Repeat the application multiple times a day, for a hydration surplus.

WARNINGS

Pressurised container: May burst if heated. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not pierce or burn, even after use. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122°F. Keep out of reach of children. Do not make use other than those specified.

Packaging
125ml AL bottle.
